Dear Cornerstone Families,

At Cornerstone Pediatric & Adolescent Medicine, your child's health, safety, and well-being are always our top priorities. We want to share our approach to childhood vaccinations so that you feel informed, confident, and supported in your healthcare decisions.

With the recent changes announced by the U.S. Department of Health and Human Services (HHS), we wanted to make clear that we will continue to follow the American Academy of Pediatrics (AAP) childhood immunization schedule. This vaccine schedule is developed by physicians and leading scientific experts, and is based on rigorous scientific research, continuous safety monitoring, and decades of experience protecting children from serious and preventable diseases.

We know that vaccines save lives and are one of the most important advancements in modern medicine. All vaccines recommended by the AAP are available at our office and are covered by health insurance. Our vaccine policy has not changed and remains in place.

At Cornerstone Pediatric & Adolescent Medicine, we provide medical care with integrity, a belief in evidence-based medicine, and a deep commitment to the families we serve. We understand that vaccine information can be challenging to navigate at times, and are always happy to answer questions, discuss concerns, and provide clear, honest information. It is important to us that you feel confident making the best decisions for your child's health.

Thank you for trusting us. It is an honor to care for your children and to partner with you in keeping your family and our community healthy.

Warm regards,

Cornerstone Pediatric & Adolescent Medicine Physicians
